SEBBY APUDO

Hello, I am Sebby Apudo. I am a web developer, 3D animator and graphics designer. My goal is to combine creative thinking and design with an analytical approach to solve problems at the intersection of business and technology. I work as a freelancer whereby I solve problems for different clients all across the world. I work great in teams, lead by example and I can be consistently relied upon to deliver quality work above expectations.

My Skills

I possess strong technical expertise in various domains in tech; graphics design, web design, 3D animation, MS - office Suite and data science. I excel in developing responsive websites and bringing creative concepts to life through engaging animations. Additionally, I am adept at data analysis, statistical modeling, and visualization using Python and excel.

Additionally, I possess strong communication skills, creative problem-solving abilities, and a knack for adapting to new technologies swiftly. I thrive in collaborative environments, valuing teamwork and contributing positively to projects.
